

learninghub

An L and an H drawn as one ligature. The left stem drops below the baseline and curls away, carrying the L; a swooping crossbar joins it to the right stem. A saffron node sits just off the end of the curl, which is where the hub idea returns: the stroke flows towards a point rather than stopping.

PRIMARY LOCKUP

TWO MASTERS

Big · 40px and above

Stroke 9/128. Full stem heights, S-curve crossbar, saffron node detached from the curl. Use for the lockup, print, splash screens and marketing.

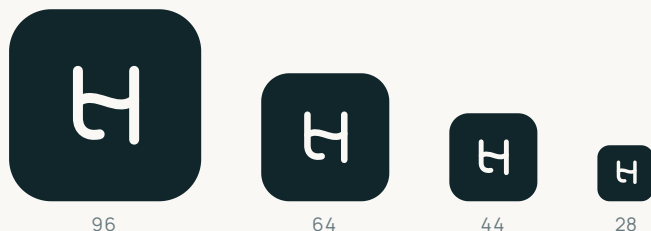

Small · under 40px

Stroke 13/128. Node dropped, stems shortened, crossbar amplitude halved so the counters stay open. Use for favicons, app tiles and UI chrome.

APP ICON

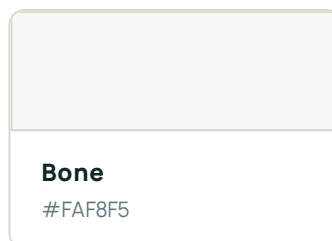

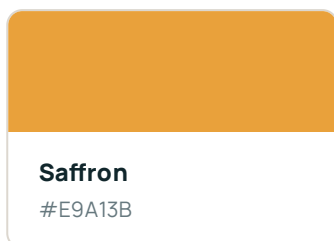

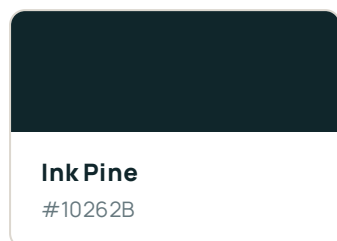

CLEAR SPACE

Keep clear space on all four sides equal to one third of the mark's height. Nothing crosses it, including the wordmark in the lockup.

COLOUR

Saffron appears once, on the node, and nowhere else in the mark. That restraint is what makes it read as a deliberate point rather than decoration.

RULES

- **Do not** use the big master below 40px. The crossbar closes up and the node turns to mud.
- **Do not** recolour the stems. The mark is Ink Pine, Bone on dark, or solid black for single-colour print.
- **Do not** add a second accent, an outline, or a drop shadow.
- **Do not** stretch. Scale both axes together.
- **Minimum size:** 16px on screen, 8mm in print, small master only.

FILES SUPPLIED

learninghub-mark.svg · big master, 128 grid
learninghub-mark-small.svg · small master, under 40px
learninghub-icon.svg · app tile, knockout on Ink Pine
learninghub-lockup.svg · horizontal lockup, text still live
learninghub-brand-sheet.html · this document, on screen

Wordmark set in Manrope, Light for "learning" and ExtraBold for "hub". Outline the type in the lockup SVG before it goes to any third party.
